Annotation Proceedings of ICT '94, held in Kansas City, Missouri from 30 August 1994 to 1 September 1994, sponsored by the International Thermoelectric Society. The conference was a forum for the exchange of recent findings within the thermoelectric field and featured presentations in the areas of both thermoelectric power generation and heating/cooling. This volume includes all 75 of the technical papers presented, arranged in four sections: high temperature materials; room/low temperature applications; room/low temperature materials; and high temperature applications. No index. Annotation c. by Book News, Inc., Portland, Or.

Accuracy and Stability of Numerical Algorithms gives a thorough, up-to-date treatment of the behavior of numerical algorithms in finite precision arithmetic. It combines algorithmic derivations, perturbation theory, and rounding error analysis, all enlivened by historical perspective and informative quotations. This second edition expands and updates the coverage of the first edition (1996) and includes numerous improvements to the original material. Two new chapters treat symmetric indefinite systems and skew-symmetric systems, and nonlinear systems and Newton's method. Twelve new sections include coverage of additional error bounds for Gaussian elimination, rank revealing LU factorizations, weighted and constrained least squares problems, and the fused multiply-add operation found on some modern computer architectures.

In the recent years significant number of advances have been made in all aspects of plant sciences and to bring the widely difference aspects under one cover is indeed a Herculean albeit subjective task. That is precisely what the effort of the editors has been in compiling Current Concepts in Botany, which is a collection of review articles as well as original research papers from contemporary fellow botanists from all over the world. This volume contains 31 authoritative and through provoking articles of both applied and fundamentals value written by leading scientists in the area of their specialization. The objective in developing this volume was to offer a detailed overview of the applied aspects of Botany in terms of its theoretical, methodological and empirical contributions. Interdisciplinary aspects of subject have been emphasized in the present volume

From the best-selling author of Case of Lies and other Nina Reilly thrillers comes a collection of crime and suspense stories, many never before published, including "The Long Walk," "Success Without College," "The Couple Behind the Curtains," "Juggernaut," "The Furnace Man," and "To Still the Beating of Her Heart." Reprint.

Devoted to the exposition of the mutual interests, political and commercial, of Great Britain and the Confederate States of America
