The Allis-Chalmers model B was the result of research by Harry Merritt, Allis tractor division manager, into U.S. farm sizes in the early 1930s. At that time, most tractors were being used on farms larger than 100 acres, while more than half of all farms were under 100 acres. The Allis B was specifically designed to enter into the small-farm market, and early literature focused on the economy of using tractors instead of horses.

TractorData.com Allis Chalmers B tractor information

This tractor was in production for nearly 20 years. From 1938 until 1957, almost 121,000 of these small farm machines drove off the assembly line.
