Innotas is a cloud portfolio management solution. It provides a top-down approach so users can have greater visibility and control for all its programs, projects, people and applications through their PPM software. It is a valuable tool for a wide range of executives, business, IT, software and project managers in helping align their organization with their business goals in a cost-effective, comprehensive yet simple-to-use application.

[Innotas Software Review: Overview—Features—Pricing](#)
For the context of this post, we will be looking at agile as it is used in portfolio management. Irrespective of "agile" per se, it's to everyone's benefit — our organization's and ours — to deliver value continuously and ideally faster. By taking an agile approach we can achieve that. Sounds good, but how does it work?
