Fighting Tyranny combines two of Gene Sharp's books in a single pocket-sized volume - From Dictatorship to Democracy and The Anti-Coup. At a time when governments around the world are becoming increasingly authoritarian and aggressive towards their citizens, this book offers ideas and nonviolent methods of action to successfully defend or establish democratic systems. From Dictatorship to Democracy - A conceptual Framework for Liberation is a practical exploration of the techniques of nonviolent struggle against totalitarian regimes. This book has been used successfully by activists from all sides of the political spectrum, by grassroots activists and state-backed colour revolutionaries alike, to overthrow governments and effect political change. The Anti-Coup - co-authored with Bruce Jenkins - explores the possibilities of

nonviolent defence against coups d' é tat. Coups may happen to a functioning democracy, or in the power vacuum that occurs after a government has been ousted. The Anti-Coup describes methods to block coups and putsch attempts which can be used by citizens and governments.

A serious introduction to the use of nonviolent action to topple dictatorships. Based on the author's study, over a period of forty years, on non-violent methods of demonstration, it was originally published in 1993 in Thailand for distribution among Burmese dissidents.

"Instructs how to strategically plan nonviolent action, a technique of waging conflict that uses protest, noncooperation and intervention. Draws parallels between nonviolent and military strategy. Documents twenty-three cases showing how nonviolent action has been applied to conflicts throughout the world in the twentieth century"--Provided by publisher.

For more than a century, from 1900 to 2006, campaigns of nonviolent resistance were more than twice as effective as their violent counterparts in achieving their stated goals. By attracting impressive support from citizens, whose activism takes the form of protests, boycotts, civil disobedience, and other forms of nonviolent noncooperation, these efforts help separate regimes from their main sources of power and produce remarkable results, even in Iran, Burma, the Philippines, and the Palestinian Territories. Combining statistical analysis with case studies of specific countries and territories, Erica Chenoweth and Maria J. Stephan detail the factors enabling such campaigns to succeed and, sometimes, causing them to fail. They find that nonviolent resistance presents fewer obstacles to moral and physical involvement and commitment, and that higher levels of participation contribute to enhanced resilience, greater opportunities for tactical

innovation and civic disruption (and therefore less incentive for a regime to maintain its status quo), and shifts in loyalty among opponents' erstwhile supporters, including members of the military establishment. Chenoweth and Stephan conclude that successful nonviolent resistance ushers in more durable and internally peaceful democracies, which are less likely to regress into civil war. Presenting a rich, evidentiary argument, they originally and systematically compare violent and nonviolent outcomes in different historical periods and geographical contexts, debunking the myth that violence occurs because of structural and environmental factors and that it is necessary to achieve certain political goals. Instead, the authors discover, violent insurgency is rarely justifiable on strategic grounds.

Sharp's Dictionary of Power and Struggle is a groundbreaking book by the "godfather of nonviolent resistance." In nearly 1,000 entries, the Dictionary defines those ideologies, political systems, strategies, methods, and concepts that form the core of nonviolent action as it has occurred throughout history and across the globe, providing much-needed clarification of language that is often mired in confusion.

This strategic planning guide is intended to assist people who wish themselves to plan a grand strategy, or super plan, to achieve their liberation from oppression and to build a more free and democratic system. This document is not only relevant to people facing internal dictatorships. It is also meant to be useful to people facing any kind of oppression.
