Engineers Canada is the national organization of the 12 provincial and territorial associations that regulate the practice of engineering in Canada. Engineers Canada serves these associations, which are its sole members, by delivering national programs for standards of engineering education, professional qualifications and professional practice. The organization was established in 1936 as the Dominion of Canada Council of Professional Engineers. In the late 1950s, the name became the Canadian Co

~~Canadian Council of Professional Engineers—Wikipedia~~

The Professional Engineers Act (PEA) gives PEO Council the authority to establish, develop and maintain standards of practice that must be adhered to by all engineers. Practice guidelines are documents that provide advice and recommendations on engineering best practices, specifically around performing engineering work in accordance with the PEA.

~~Canadian Professional Engineering And Geoscience ...~~

Canada's engineering profession is uniquely regulated. Each of the thirteen provinces and territories has legislated that engineering work may only be performed by individuals who meet specific experiential and educational requirements and hold a valid Professional Engineer ("P.Eng.") license. Unlicensed individuals may work within the engineering profession, but are prohibited from using the title "Engineer" and must work under the supervision of a responsible license-holder.
