Coleman Rv Air Conditioner Installation

The primary Coleman air conditioner for RV use is the standard Coleman 13500 BTU RV air conditioner. This 90-pound model installs on the roof of the RV near the ceiling vent. It's a large unit, but by most accounts easy to install and long-lasting. It's currently priced on Amazon and elsewhere just under \$650.

Auto-fan kit for Coleman Mach RV Air Conditioners. Kit comes with an auto-fan switch so the fan only runs when the air conditioner is cooling, saving energy and cutting down on wind and noise. Easy to install (removal of ceiling assembly required). Completely reversible to factory A/C condition: no cutting wires, fits into existing wiring.

Aftermarket Auto-fan Kits for Coleman RV Air Conditioners

Attach the manifold gauge to the suction side of the unit, this is the large copper tubing. Turn the air conditioner on by putting it on the lowest setting possible. Read the gauge to make sure you need to top up or recharge. Once you see that it does, attach the coolant container to the suction tubing and open it up.
