The three physical evidence strategies are built on the foundation of Locard ' s Principle of Exchange, which states that ' every contact leaves a trace ' . They are: crime scene strategy (see managing scenes) forensic strategy; pathology strategy.

~~Physical evidence~~

A crime scene is not merely the immediate area where a body is located or where an assailant concentrated his activities but can also encompass a vehicle and access/escape routes. Although there are common items which are frequently collected as evidence (fingerprints, shoeprints, or bloodstains), literally any object can be physical evidence.

~~Crime Scene Response Guidelines:~~

~~Overview~~

A crime scene is any location that may be associated with a committed crime. Crime scenes contain physical evidence that is pertinent to a criminal investigation. This evidence is collected by crime scene investigators (CSIs) and law enforcement. The location of a crime scene can be the place where the crime took place or can be any area that contains evidence from the crime itself.
