This open access book offers a comprehensive overview of the role and potential of microorganisms in the degradation and preservation of cultural materials (e.g. stone, metals, graphic documents, textiles, paintings, glass, etc.). Microorganisms are a major cause of deterioration in cultural artefacts, both in the case of outdoor monuments and archaeological finds. This book covers the microorganisms involved in biodeterioration and control methods used to reduce their impact on cultural artefacts. Additionally, the reader will learn more about how microorganisms can be used for the preservation and protection of cultural artefacts through bio-based and eco-friendly materials. New avenues for developing methods and materials for the conservation of cultural artefacts are discussed, together with concrete advances in terms of sustainability, effectiveness and toxicity, making the book essential reading for anyone interested

This accessible, practice-oriented and compact text provides a hands-on introduction to market research. Using the market research process as a framework, it explains how to collect and describe data and presents the most important and frequently used quantitative analysis techniques, such as ANOVA, regression analysis, factor analysis and cluster analysis. The book describes the theoretical choices a market researcher has to make with regard to each technique, discusses how these are converted into actions in IBM SPSS version 22 and how to interpret the output. Each chapter concludes with a case study that illustrates the process using real-world data. A comprehensive Web appendix includes additional analysis techniques, datasets, video files and case studies. Tags in the text allow readers to quickly access Web

For the world's leading car-makers, the early 1990s brought radical changes. The reports published by MIT shocked management in European and American industries. Former major companies had to face consequences no one had expected. The assembly-lines were reorganized in order to achieve higher quality at lower costs. Five years

after the MIT report, this book poses the question: What are the results of this revolution in work organization? Scientists and practitioners, many of them involved in earlier reports, evaluate the changes to the automotive industry in Europe and Japan. An insight into recent concepts in automation and the organization of production.

It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of Barbarians at the Gate and The Big Short comes the riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and even, for a moment, the halls

of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a \$27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG—in the midst of the post-Great Recession slump—had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars' hedge fund lenders and bondholders had scooped up the company's paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs—if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death

mentality continues to shock workers, politicians, and broader society—and even each other. In *The Caesars Palace Coup*, financial journalists Max Frumes and Sujcet Indap illuminate the brutal tactics of distressed debt mavens—vultures, as they are condemned—in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.

This volume presents a systematic and comprehensive analysis of the Spanish evidential semi-auxiliaries *parecer* and *resultar*, the modal constructions with *amenazar* and *prometer*, and the modal auxiliaries *poder*, *deber* and *tener que*. These verbs have never been considered together in a global approach that transcends the classical "verbal periphrases" model. The book proposes a cognitive-functional account of evidentiality and modality in Spanish with special attention

to subjectivity and grounding. The theoretical reflection relies on empirical evidence of two sorts: synchronic and diachronic corpus-analyses alternate with tests that measure the semantic and pragmatic compatibility of the evidential and epistemic constructions with specific sentences. Following the assumption that linguistic forms are determined by their meaning, the array of constructions that characterizes the different verbs justifies their grouping in three pairs of (semi-)auxiliaries: parecer vs resultar, amenazar vs prometer and poder vs deber/tener que. The distributional differences observed in the corpus are further shown to correlate with different degrees of grammaticalization. Primarily intended for scholars working in the field of Spanish functional linguistics, the monograph is also relevant for grammaticalization studies and for cognitive-semantic research at large. Given its combined theoretical and applied character, the

volume is also of interest to anyone concerned with syntactic processes, lexical semantics or the wider area of discourse analysis and pragmatics.

The global reach of the Spanish and Portuguese empires prompted a remarkable flourishing of the classical rhetorical tradition in various parts of the early modern world. *Empire of Eloquence* is the first study to examine this tradition as part of a wider global renaissance in Europe, the Americas, Asia and Africa, with a particular focus on the Iberian world. Spanning the sixteenth to the early nineteenth centuries, the book argues that the classical rhetorical tradition contributed to the ideological coherence and equilibrium of this early modern Iberian world, providing important occasions for persuasion, legitimation and eventual (and perhaps inevitable) confrontation. Drawing on archival

collections in thirteen countries, Stuart M. McManus places these developments in the context of civic, religious and institutional rituals attended by the multi-ethnic population of the Iberian world and beyond, and shows how they influenced public speaking in non-European languages, such as Konkani and Chinese.

In *How to Super Tune and Modify Holley Carburetors*, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your performance application.

The book examines some of the ways in which contemporary forms of political dissent are situated within processes of global ordering. Grounded in analysis of concrete practices of discipline and dissent in

specific contexts, it explores the ways in which resistance can be shaped by dominant ways of thinking, seeing or enacting politics and by the multiform relations of power at play in the making of global order. The contributions, written from a variety of disciplinary backgrounds, address themes such as the processes through which particular sorts of resisting subjects are produced; the politics of knowledge in which resisting practices are embedded; the ways in which visual technologies are deployed within and towards oppositional practices; and the politics of gender, race and class within spaces of contestation. The volume thus opens up space for critical reflection and inter-disciplinary dialogue on what it means to be a resisting subject and on the interplay between the power and counter-power in global order. This book was published as a special issue of Globalizations.
