In this instructional demo, we'll design frames in an Inventor assembly environment. We'll perform calculations related to frame designing. We'll then apply the fasteners in assembly as required. We'll insert the power transmission components and springs in the frame. Finally, we'll perform frame analysis to test the frame strength. We'll take an example of a real-world model and help you ...

The engineering design of electromagnets is systematized by means of the concept of the magnetic circuit.In the magnetic circuit a magnetomotive force F, or Fm, is defined as the ampere-turns of the coil that generates the magnetic field to produce the magnetic flux in the circuit. Thus, if a coil of n turns per metre carries a current i amperes, the field inside the coil is ni amperes per ...
