This system comprises an inter-related set of institutions, governance arrangements, regulations, norms and practices that aim to implement the United Nations Framework Convention on Climate Change (UNFCCC). Arguing that governance is a neutral term to ...

Governing the climate change regime

By Julia Kreienkamp, UCL Global Governance Institute. The adoption of the 2015 Paris Agreement has been widely celebrated as a historic achievement. It enshrines a new logic of global cooperation, representing a decisive shift away from the top-down regulatory approach that had previously underpinned the international climate change regime. This shift can best be understood in light of the historical evolution of the legal and institutional framework for global collaborative climate action.

Governing the Climate Change Regime: Institutional ...

In political ecology and environmental policy, climate governance is the diplomacy, mechanisms and response measures "aimed at steering social systems towards preventing, mitigating or adapting to the risks posed by climate change". A definitive interpretation is complicated by the wide range of political and social science traditions that are engaged in conceiving and analysing climate governance at different levels and across different arenas. In academia, climate governance has become the con
