Which is more dangerous, a gun or a swimming pool? What do schoolteachers and sumo wrestlers have in common? How much do parents really matter? These may not sound like typical questions for an economist to ask. But Steven D. Levitt is not a typical economist. He studies the riddles of everyday life--from cheating and crime to parenting and sports--and reaches conclusions that turn conventional wisdom on its head. Freakonomics is a groundbreaking collaboration between Levitt and Stephen J. Dubner, an award-winning author and journalist. They set out to explore the inner workings of a crack gang, the truth about real estate agents, the secrets of the Ku Klux Klan, and much more. Through forceful storytelling and wry insight, they show that economics is, at root, the study of incentives--how people get what they want or need, especially when other people want or need the same thing.

A groundbreaking introduction to vectors, matrices, and least squares for engineering applications, offering a wealth of practical examples.

One of the most important studies ever published on eighteenth-century Russia, Victor Zhivovs Language and Culture in Eighteenth-Century Russia now brings an essential work on the genesis of modern Russian culture to a wider, English-speaking audience. Historians and students of Russian culture agree that the creation of a Russian literary language was key to the formation of a modern secular culture, and Zhivovs book traces the growth of a vernacular language from the hybrid Slavonic of the late seventeenth century through the debates between archaists and innovators of the early nineteenth century. An essential addition to the library of any Russian scholar.

This best-selling memoir from Richard Proenneke's journals and with firsthand knowledge of his subject and the setting, Sam Keith has woven a tribute to a man who carved his masterpiece out of the beyond. To live in a pristine land unchanged by man . . . to roam a wilderness through which few other humans has passed . . . to choose an idyllic site, cut trees by hand, and build a log cabin. . . to be self-sufficient craftsman, making what is needed from materials available...to be not at odds with the world, but content with one's own thoughts, dreams and company. Thousands have had such dreams, but Richard Proenneke lived them. This book is a moving account of the day-to-day explorations and activities Dick carried out alone....alone in the wilderness...and the constant chain of nature's events that kept him company.
