For courses in Mathematics for Business and Mathematical Methods in Business.This classic text continues to provide a mathematical foundation for students in business, economics, and the life and social sciences. Abundant applications cover such diverse areas as business, economics, biology, medicine, sociology, psychology, ecology, statistics, earth science, and archaeology. Its depth and completeness of coverage enables instructors to tailor their courses to students' needs. The authors frequently employ novel derivations that are not widespread in other books at this level. The Twelfth Edition has been updated to make the text even more student-friendly and easy to understand.

After finishing a circumnavigation over five years, Klaus and Maria Haeussler reentered the civil life with its struggle and routine. But they had underestimated the sustainable impact of the free life. And so it wasn't a surprise that they were on the way again after two years on land - this time without a solid schedule. They gave up their civil existence with all consequences. Over the course of 13 years from 1998 to 2011, they left 70,000 nautical miles in their wake and sailed in extreme regions from the Northern Atlantic to Cape Horn. During a one and a half times circumnavigation of the Pacific Ocean they came into contact with the different cultures of Patagonia (with an excursion to Antarctica), Polynesia, New Zealand and Australia, Micronesia, Japan, the Aleutians, Alaska and Hawaii. With a great love for detail, Klaus Haeussler portrays this adventure filled period of their lives. In 2010, in Cuxhaven, Germany, Klaus and Maria were awarded with the coveted Trans-Ocean Preis for this outstanding voyage. Keywords: Transcontinental, Sailing, World, Circumnavigating, Circumnavigation, Haeussler, Adventure, Trans Ocean, Voyage, Voyage, Journey

This introductory text begins with precalculus and finite maths topics such as equations, functions, matrix algebra, linear programming, mathematics of finance, and probability, and then progresses through single and multivariable calculus.

Haeussler, Paul, and Wood establish a strong algebraic foundation that sets this text apart from other applied mathematics texts, paving the way for students to solve real-world problems that use calculus. Emphasis on developing algebraic skills is extended to the exercises-including both drill problems and applications. KEY TOPICS: Review of Algebra;Applications and More Algebra;Functions and Graphs;Lines, Parabolas, and Systems;Exponential and Logarithmic Functions;Mathematics of Finance;Matrix Algebra;Linear Programming;Introduction to Probability and Statistics;Additional Topics in Probability;Limits and Continuity;Differentiation;Additional Differentiation Topics;Curve Sketching;Integration;Applications of Integration;Continuous Random Variables;Multivariable Calculus MARKET: Appropriate for Mathematics for Business Courses.
