Meaning in Interaction: An Introduction to Pragmatics is a comprehensive introductory text which discusses the development of pragmatics - its aims and methodology - and also introduces themes that are not generally covered in other texts. Jenny Thomas focuses on the dynamic nature of speaker meaning, considering the central roles of both speaker and hearer, and takes into account the social and psychological factors involved in the generation and interpretation of utterances. The book includes a detailed examination of the development of Pragmatics as a discipline, drawing attention to problems encountered in earlier work, and brings the reader up to date with recent discussion in the field. The book is written principally for students with no previous knowledge of pragmatics, and the basic concepts are covered in considerable detail. Theoretical and more complicated information is highlighted with examples that have been drawn from the media, fiction and real-life interaction, and makes the study more accessible to newcomers. It is an ideal introductory textbook for students of linguistics and for all who are interested in analysing problems in communication.

This is an introduction to pragmatics, the study of how people make sense of each other linguistically. The author explains, and illustrates, basic concepts such as the co-operative principle, deixis, and speech acts, providing a clear, concise foundation for further study.

Introduction to Pragmatics guides students through traditional and new approaches in the field, focusing particularly on phenomena at the elusive semantics/pragmatics boundary to explore the role of context in linguistic communication. Offers students an accessible introduction and an up-to-date survey of the field, encompassing both established and new approaches to pragmatics. Addresses the traditional range of topics – such as implicature, reference, presupposition, and speech acts – as well as newer areas of research, including neo-Gricean theories, Relevance Theory, information structure, inference, and dynamic approaches to meaning. Explores the relationship and boundaries between semantics and pragmatics. Ideal for students coming to pragmatics for the first time.

In the study of language, as in any other systematic study, there is no neutral terminology. Every technical term is an expression of the assumptions and theoretical presuppositions of its users; and in this introduction, we want to clarify some of the issues that have surrounded the assumptions behind the use of the two terms "speech acts" and "pragmatics". The notion of a speech act is fairly well understood. The theory of speech acts starts with the assumption that the minimal unit of human communication is not a sentence or other expression, but rather the performance of certain kinds of acts, such as making statements, asking questions, giving orders, describing, explaining, apologizing, thanking, congratulating, etc. Characteristically, a speaker performs one or more of these acts by uttering a sentence or sentences; but the act itself is not to be confused with a sentence or other expression uttered in its performance. Such types of acts as those exemplified above are called, following Austin, illocutionary acts, and they are standardly contrasted in the literature with certain other types of acts such as perlocutionary acts and propositional acts. Perlocutionary acts have to do with those effects which our utterances have on hearers which go beyond the hearer's understanding of the utterance. Such acts as convincing, persuading, annoying, amusing, and frightening are all cases of perlocutionary acts.

knowledge about a topic or to reach a variety of goals. To be successful, one has to follow some important strategies. Beside the rule of the language philosopher H.P. Grice, which is called the Cooperative Principle, there exists another concept that served when people are talking. It is called the Politeness Principle which has above all been developed by Leech. In the centre of this concept does not stand the information of a conversation, but the effect of what is said on the people. [...]
