I DON'T KNOW ANYBODY who has ever done such a daring thing as I have done, twenty-two-year-old Aileen Kilgore of Brookwood, Alabama, wrote in her diary in January 1944, after enlisting in the Women's Army Corps (WAC) during World War II. From basic training in Fort Oglethorpe, Georgia, to her discharge in late 1945, Kilgore served as one of more than 150,000 American women who joined the Women's Army Corps - the first group of women other than nurses to serve in the ranks of the United States Army. Aileen Kilgore Henderson has now collected and edited diary entries and personal letters that recount in an engaging narrative style her twenty-three months of experiences in the army. Recording the excitement and anxiety of enlisting, along with the camaraderie, challenges, and monotony of military life and labor, Henderson had a keen eye for the newness of her undertakings. She worked as one of only six female airplane mechanics at Ellington Air Force Base and as a photo lab technician, and she provides a detailed document of daily life in the service. Additionally, Henderson reveals the public scrutiny and criticism WAC members faced as they assumed nontraditional roles. A fascinatin

Batting Stance Guy never expected he would become a YouTube celebrity, racking up more than two million views, landing profiles in The New York Times and USA Today, and even scoring an appearance on the Late Show with David Letterman. But when a friend and neighbor started capturing this man's unusual talents with a video camera, that's what happened. With uncanny precision, Batting Stance Guy can mimic any baseball player he's ever seen, and the results will take you back—to the game last night, or last year, or in 1980, or anywhere in-between.

From working a row to putting in chain space between stitches, this step-by-step guide with illustrations provides a practical how-to guide to the art of crocheting with visual answers to common questions.

The first Turing gate, a mere hundred nanometers across, is forced open in 1963, at the high-energy physics laboratory in Brookhaven; three years later, the first man to travel to an alternate history takes his momentous step, and an empire is born. For fifteen years, the version of America that calls itself the Real has used its Turing gate technology to infiltrate a wide variety of alternate Americas, rebuilding those wrecked by nuclear war, fomenting revolutions and waging war to free others from communist or fascist rule, and establishing a Pan-

American Alliance. Then a nation exhausted by endless strife elects Jimmy Carter on a reconstruction and reconciliation ticket, the CIA's covert operations are wound down, and the Real begins to wage peace rather than war. But some people believe that it is the Real's manifest destiny to impose its idea of truth, justice, and the American way in every known alternate history, and they're prepared to do anything to reverse Carter's peacenik doctrine. When Adam Stone, a former CIA field officer, one of the Cowboy Angels who worked covertly in other histories, volunteers for reactivation after an old friend begins a killing spree across alternate histories, his mission uncovers a startling secret about the operation of the Turing gates and leads him into the heart of an audacious conspiracy to change the history of every America in the multiverse—including our own. This book is a vivid, helter-skelter thriller in which one version of America discovers the true cost of empire building, and one man discovers that an individual really can make a difference. Synopsis: Web sites are an essential tool that every business must have in today's economy. Only 15 years ago, you could count the number of Web sites in the world with five or six digits; today there are between 15 and 30 billion active Web sites and millions more being added every day. Creating a Web site can be a great way to market a new product, promote your business plan, promote yourself, or simply share a few details about your life with the world. The cost of creating a Web site has risen right alongside the number of Web sites created though and many people are nervous about being able to utilize this revolutionary medium without breaking the bank. This book has been created for just such people, outlining for you in perfect detail everything you need to know to create a traffic attracting Web site, while spending little or no money at all. There are countless resources available, and when you put them all together, they provide a complete toolkit that can make anyone a top notch Web site in no time flat. You will learn how to buy a domain name and host your Web site for less than \$15, with no additional fees charged to your account. You will learn how to use open source software like Wordpress, Joomla, and Mambo to create a platform on which you can build anything you want. You will learn how blogging has made Web site creation easier than ever and how sites like Squidoo, Facebook, and MySpace allow you more freedom to build traffic and draw more attention to what you are advertising at any given time. You will learn how to use common software to edit and tweak your Web sites and how to read the basic code that all Web sites are created in. In addition, an entire chapter is devoted to teaching you how to promote your Web site and draw traffic to it, without spending a dime in the process. You will learn why information is the most valuable asset on the market and how you can become an expert in a niche of your choosing, making money to cover any fees associated with your Web site. With the added resource of hours of interviews with web professionals you will learn which free resources not to use and which ones to outright avoid, as well as how to find and install open source modules and tools to enhance the look and feel of your site. You will learn where you can find copyright-free images to use on your Web sites and how to get free copy that will draw traffic and entertain your visitors. You will learn how to keep a free Web site from falling into the traps the major search engines set to stop spam and ultimately how to leverage new friends, business contacts, and interactions out of your Web site. If you are now, or have ever, considered starting your own Web site before, this book will map the way for you.
