Welcome to Corporate Life. The NEW Employee Manual is not your Dad's or Mom's employee manual. It's the new playbook for corporate survival, fitting today's realities and the challenges facing employees who join or work in large, seemingly successful companies. Those companies already issued very specific and detailed employee manuals covering everything under the sun except how to compete well in our brave new world. The NEW Employee Manual will help you navigate the Corporate (with a capital C) labyrinth. Where Corporate's manual shapes you into a dutiful cog for the good of the machine, ours helps you enhance your career for the good of, well, you ... and your company. The NEW Employee Manual should make you feel skeptical: skeptical of empty slogans, obsolete rituals, obsessive pursuits, and bigwigs' playbooks that no longer work. That alone should be worth this book's price. Skepticism, you see, is a good thing, because it is

only the skeptic, only the free-thinker, only the maverick, who asks new questions and finds useful answers. So, are you a maverick or a cog?

Hatch and Sumner's Paediatric Anaesthesia is a thorough revision and update of the extremely popular 'Paediatric Anaesthesia' by Edward Sumner and David Hatch. A new editorial team has carefully revised the text and developed it into a concise textbook that provides all the information that a trainee or practising paediatric anaesthetist should know. Thoroughly comprehensive, yet concise and manageable in size, this book is entirely practical and relevant, presenting all the newest information on the conditions and potential problems seen in every day practice. Each chapter has been thoroughly revisited by existing and new contributors from a global community of experts and the result is an invaluable reference work that will be a continual source of information for any paediatric anaesthetist.

The definitive and essential source of reference for all laboratories involved in the analysis of human semen.

Origins of Clinical Chemistry: The Evolution of Protein Analysis covers the history of the application of analytical methods to the plasma protein analysis. This book is divided into 20 chapters that consider the relationship between the limitation of technical accuracy and clinical interpretation. The introductory chapters provide an overview of the concept and issues in protein chemistry, as well as the history of organic chemistry. The succeeding chapters deal with the classification, detection, fractionation, and analysis of proteins. Considerable chapters are devoted to various analytical techniques for protein analysis, including colorimetry, photometry, Svedberg technique, ultracentrifuging, zone electrophoresis, immunohistochemical methods, and radioimmunoassay. The remaining chapters examine the detection and analysis of proteins in several body fluids, such as urine and cerebrospinal fluid. This book will be of great value to clinical, analytical, and organic chemists, as well as to protein scientists and researchers.

Trichology is the science of the structure, function and diseases of the human hair. This book is a comprehensive guide to the diagnosis and treatment of diseases and disorders of the hair and scalp. Divided into six sections, the text begins with an overview of hair and the normal scalp, factors controlling hair growth and changes that occur

during the aging process. The next section discusses diagnostic trichology methods including microscopy and trichoscopy. The following chapters detail the diagnosis and treatment of numerous hair disorders covering both clinical and surgical procedures, for common and more complex conditions. A chapter on recent advances in surgical management is included. The final section discusses interdisciplinary issues in the management of hair disorders such as paediatric, psychiatric, gynaecologic and endocrinologic liaison therapy. Each chapter begins with a 'key messages' box and concludes with a summary of the topic. The book is highly illustrated with clinical photographs, diagrams and tables. Key points
