course, Probability and Statistics for Computer Science features:

- A treatment of random variables and expectations dealing primarily with the discrete case.
- A practical treatment of simulation, showing how many interesting probabilities and expectations can be extracted, with particular emphasis on Markov chains.
- A clear but crisp account of simple point inference strategies (maximum likelihood; Bayesian inference) in simple contexts. This is extended to cover some confidence intervals, samples and populations for random sampling with replacement, and the simplest

Weaves together biblical exposition and practical application to demonstrate how emotions relate to the Christian life. Emotions are a vital part of what it means to be a human being made in the image of God and redeemed in Jesus Christ. But often our emotions confuse and mislead us. So what is the proper place for emotions in a Christian's walk of faith? In *Feelings and Faith* Brian Borgman draws from his extensive biblical knowledge and his pastoral experience to help readers understand both

divine and human emotions. After laying a biblical foundation he moves on to practical application, focusing on how Christians can put to death ungodly emotional displays and also cultivate godly emotions. This biblically informed, practical volume is helpful for pastors, counselors, and serious-minded Christians who wish to develop a full-orbed faith that encompasses their emotional life.
