Manual of Psychiatric Nursing Care Planning: Assessment Guides, Diagnoses, Psychopharmacology (Varcarolis, Manual of Psychiatric Nursing Care Plans)

A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 5th Edition supplies you with the latest diagnostic information available, including the DSM-5, for accurate assessment and diagnosis of patients. It offers quick and easy access to plans of care for a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth Varcarolis, provides a clinically-based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. The latest diagnoses, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. A focus on clinical information furnishes you with information on providing patient care in a range of settings. Assessment Guides, including tables, charts, and questionnaires facilitate patient diagnosis and care. A chapter on Major Psychotropic Interventions and Patient and Family Teaching, in addition to the content found in each disorder chapter, helps you better understand the uses and workings of the psychotropic agents. Coverage of major disorders exposes you to a wide range of disorders within psychiatric nursing. NEW! The most recent information in the field, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. NEW! 2007 ANA Psychiatric Mental-Health Nursing Scope and Standards of Practice familiarize you with the current guidelines for the practice of psychiatric nursing. NEW! Updated 2012-2014NANDA-I Nursing Diagnoses present information on the latest nursing diagnoses related to psychiatric nursing. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients.

A thoughtful, portable clinical companion, Varcarolis' Manual of Psychiatric Nursing Care Planning: An Interprofessional Approach, 6th Edition, provides you with the latest diagnostic information available, including the DSM-5 and patient problems, for accurate assessment and diagnosis of patients. This clinically-based guide offers quick and easy access to the latest psychiatric nursing care planning guidelines for a range of settings including the inpatient unit, home care, or community mental health setting. Designed to accompany Foundations of Psychiatric-Mental Health Nursing, the refreshed and updated edition is a perfect reference for learning to create psychiatric nursing care plans. A thoroughly revised patient centered assessment, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. The latest patient problems, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing patient problems, etiology, assessment findings/diagnostic cues, outcome criteria, long- and short-term goals, and interventions and rationales offer plans of care for a wide range of psychiatric nursing diagnoses. Promising brain stimulation therapies are addressed in a separate chapter NEW! A separate sleep disorder chapter addresses alterations present in all psychiatric disorders. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients. NEW! Updated, refreshed, and refined Manual improves overall design and reduces extraneous content to focus on essential clinical information.

A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 Psychiatric Mental-Health Nursing: Scope and Standards of Practice. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy.

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott's Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions—with rationale—to address particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.

This handy pocket guide is designed to assist in the assessment of psychiatric nursing clients, the formulation of nursing diagnoses, and the design of psychiatric nursing care plans. The book contains practical, clinically-oriented information.

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.

A thoughtful, portable clinical companion, Varcarolis' Manual of Psychiatric Nursing Care Planning: An Interprofessional Approach, 6th Edition, provides you with the latest diagnostic information available, including the DSM-5 and patient problems, for accurate assessment and diagnosis of patients. This clinically-based guide offers quick and easy access to the latest psychiatric nursing care planning guidelines for a range of settings including the inpatient unit, home care, or community mental health setting. Designed to accompany Foundations of Psychiatric-Mental Health Nursing, the refreshed and updated edition is a perfect reference for learning to create psychiatric nursing care plans. A thoroughly revised patient centered assessment, including the DSM-5, supplies you with the latest diagnostic information available for accurate assessment and diagnosis of patients. The latest patient problems, assessment and treatment strategies, and psychotropic drug information keep you up-to-date with the most current information. Care plans containing patient problems, etiology, assessment findings/diagnostic cues, outcome criteria, and interventions and rationales provide guidance for supporting patients with a wide range of psychiatric alterations. Talk-based therapies covered and referred to in a dedicated chapter on psychotherapeutic models. Promising brain stimulation therapies are addressed in a separate chapter NEW! A separate sleep disorder chapter addresses alterations present in all psychiatric disorders. NEW! Updated medications equip you with the latest information on medications used with psychiatric patients. NEW! Updated, refreshed, and refined Manual improves overall design and reduces extraneous content to focus on essential clinical information.

The revised reprint includes all new DSM-5 updates, updated psychiatric nursing content, along with new opening unit pages with vignettes, Selected Concept boxes and a new chapter on stress and stress-related disorders. This updated version equips yourself for today's psychiatric nursing practice with all of the essential nursing interventions and clinical content combined with current research and evidence-based practice. From the author of the bestselling Foundations of Psychiatric Mental Health Nursing, this text was specifically developed to effectively prepare students in today's shorter courses. New DSM-5 criteria boxes in an appendix Updated Chapters include: Chapter 17: Schizophrenia Spectrum Disorder – new material on the Recovery Model adapted for schizophrenia, new Matrix 7 domains for Cognition affected by Schizophrenia, and an updated chapter drug table which now includes the latest drugs for schizophrenia Chapter 15: Mood Disorders: Depression – the chapter drug table has been updated with the latest drugs for depression Chapter 16: Bipolar Spectrum Disorders – the medication tables have been updated throughout Chapter 11: Anxiety, Anxiety Disorders, and Obsessive-Compulsive Disorders – this chapter has been updated with new content Chapter 12: Somatoform Disorders and Dissociative Disorders – the section on somatic symptom disorder has been thoroughly revised Chapter 19: Addiction and Compulsions – this chapter has been rewritten with additions of substances, medications and new tables UNIQUE! Examining the Evidence boxes explain the reasoning behind nursing interventions and how research affects everyday practice. UNIQUE! Applying the Art sections communication tables in the clinical chapters provide examples of therapeutic and nontherapeutic communication techniques as well as realistic nurse-patient interaction scenarios. Key concepts and terms clarify essential terminology. Potential Nursing Diagnosis tables give several possible nursing diagnoses for a particular disorder along with the associated signs and symptoms. Vignettes offer succinct, real-life glimpses into clinical practice by describing patients and their psychiatric disorders. Assessment Guidelines familiarize readers with methods of assessing patients. Critical thinking questions introduce clinical situations in psychiatric nursing. Key Points to Remember outline the main concepts of each chapter in an easy to comprehend and concise bulleted list.
