Plant seeds according to the package directions in full sun. Water daily to keep the soil very moist until you see the sprouts. Then water an inch per week through the season. You can plant a crop in late spring and again in mid summer for two harvests. Or plant several seeds every few weeks and you will have continuous beans through the entire season.

As indoor plants, tomatoes will not produce as much fruit as the summer varieties, however. When growing them indoors, place them where they receive full sun and temperatures of at least 65°F. Plant the seeds in six-inch pots about a  $\frac{1}{4}$  inch deep. Keep the soil moist and in a warmer location to germinate.
