The authors, who have more than two decades of combined experience teaching an atoms-first course, have gone beyond reorganizing the topics. They emphasize the particulate nature of matter throughout the book in the text, art, and problems, while placing the chemistry in a biological, environmental, or geological context. The authors use a consistent problem-solving model and provide students with ample opportunities to practice.

All general chemistry students face similar challenges but they use their textbook to meet those challenges in different ways. Some read chapters from beginning to end, some consult the book as a reference, and some look to the book for problem-solving help. Chemistry: The Science in Context, Third Edition was written and designed to help every kind of student,

The Matamata is a Vastusastra, i.e. a treatise on dwelling, and as such, it deals with all the facets of gods' and men's dwellings, from the choice of the site to the iconography of the temple walls. It contains numerous and precise descriptions of villages and towns as well as of the temples, houses, mansions and palaces. It gives indications for the selection of proper orientation, right dimensions, and appropriate materials. It intends to be a manual for the architect and a guidebook for the layman. Well thought of by traditional architects (sthapati-s) of South India, the treatise is of great interest at a time when technical traditions, in all fields, are being scrutinized for their possible modern application. The present bilingual edition prepared by Dr Bruno Dagens contains

critically edited Sanskrit text which is an improvement over the earlier edition by the same scholar and published as No.40 of Publications de L'Institut Francaisd' Indologie, Pondicherry. The English translation, also published earlier, has now been revised with copious notes. The usefulness of the edition has been further enhanced by adding an analytical table of contents and a comprehensive glossary. In the series of Kalamulasastra early texts on music, namely, Matralaksanam, Dattilam and Brhaddest, have been published. The medieval texts on music, especially, the Sribastamuktavali (No.3 in the series) and the Nartananirnaya (No.17 in the series), bring us up to the 15th and 16th centuries. In the case of architecture, despite the IGNCA's endeavour to publish portions of the Brhatsamhita, the Agni Purana and the Visnudharmottara-Purana, first, this has not been possible. Instead, our scholars

were able to complete work first on a late but important text, namely, Silparatnakosa. We hope that the sections on architecture in the Brhatsamhita, the Agni Purana and the Visnudharmottara-Purana which predate the medieval texts, will be published soon, along with revised and re-edited texts of Manasollasa and Aparajitaprccha. The Mayamatam is the fourteenth and fifteenth volumes in the Kalamulasastra series of the Indira Gandhi National Centre for the Arts (IGNCA).

Chop-Monster is a sequential jazz improvisation method by acclaimed jazz pianist and educator Shelly Berg that utilizes a "call-and-response" approach: students listen to a jazz idea, imitate it until it is internalized, and then "try it on their own." In Chop-Monster 1, students will hear and improvise to the Ima7, iimi7, and V7 chords in the key of B-flat, plus a
