Micheler analyses the German,

Austrian and English law of securities, addressing the rules governing transfers of securities, including unauthorised transfers, equities arising out of defective issues, and the holding of securities through intermediaries. The book presents an account of the current English, German and Austrian regimes. It has been written with a view to explaining the German and Austrian regime to readers with a common law background and to explaining the English regime to readers with a civil law background. Micheler also aims to determine whether globalisation will cause the two different approaches to converge. It concludes that the respective rules in all three jurisdictions have historically evolved consistently with incumbent legal doctrine. This pattern of change is

likely to continue. Convergence will occur on a functional rather than doctrinal level. Moreover, recent reform initiatives advanced by the UNIDROIT and the EU will lead to functional rather than doctrinal convergence.

An excellent account of practice on both sides of the Atlantic regarding the intersection of antitrust and intellectual property rights. The author provides a detailed account of the legal

discussion in an economics-informed manner. A must read, as far as I am concerned, for practitioners and academicians alike. Petros C.

Mavroidis, Columbia Law School, New York, US, University of Neuch'el, Switzerland and CEPR, UK This book examines the growing divergences between the EU and the US in their approach to antitrust law enforcement, particularly where it relates to intellectual property (IP) rights. The scope of US antitrust law as defined in the Supreme Court's decisions in *Trinko* and *Credit Suisse Securities* is much narrower than the scope of EU competition law. US antitrust enforcers have become increasingly reluctant to apply antitrust rules to regulated markets, whereas the European Commission has consistently used EU competition rules to correct the

externalities resulting from government action. The contrasting approaches adopted by US and EU antitrust enforcers to these issues, as with the differences in addressing market dominance, have had a profound impact on the scope of antitrust intervention in the IP field. This book provides an in-depth analysis of the relevant recent developments on both sides of the Atlantic and identifies the pitfalls of regulating IP through competition rules. With a unique comparative perspective, this book will be an invaluable resource for postgraduate students, academics and practitioners in IP and competition law.

Edited by eminent banking law scholar Ross Cranston, this is a collection of essays written in honor of Roy Goode, the Norton Rose Professor of English

Law at Oxford and highly esteemed commercial law scholar. The contributors, an international group of distinguished commercial lawyers, address topics including international contracts and sales, credit and security, and commercial arbitration. Making Commercial Law is a truly international collection that will be of great interest to scholars of commercial law worldwide, and to practitioners working in the areas of finance and international banking.

This book examines how law functions in a multitude of facets and dimensions. The contributions shed light on the study of comparative law in legal scholarship, the relevance of comparative law in legal practice, and the importance of comparative law in legal education. The book will

Study particularly appeal to those engaged in the teaching and scholarship of comparative law, and those seeking to uncover the various significant dimensions of the workings of law. The book is organised in three parts. Part I addresses scholarship, with contributors examining comparative legal issues as critique and from a theoretical framework. Part II outlines practice, with contributors discussing the function of comparative law in such comparatively diverse areas as international arbitration, environment, and the rule of law. Part III appraises comparative law in education.

The Oxford Handbook of Comparative Law provides a wide-ranging and highly diverse critical survey of comparative law at the beginning of the twenty-first century. It summarizes

and evaluates a discipline that is time-honoured but not easily understood in all its dimensions. In the current era of globalization, this discipline is more relevant than ever, both on the academic and on the practical level. The Handbook is divided into three main sections. Section I surveys how comparative law has developed and where it stands today in various parts of the world. This includes not only traditional model jurisdictions, such as France, Germany, and the United States, but also other regions like Eastern Europe, East Asia, and Latin America. Section II then discusses the major approaches to comparative law - its methods, goals, and its relationship with other fields, such as legal history, economics, and linguistics. Finally, section III deals with the status of comparative studies in over a dozen

subject matter areas, including the major categories of private, economic, public, and criminal law. The Handbook contains forty two chapters which are written by experts from around the world. The aim of each chapter is to provide an accessible, original, and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come. Each chapter also includes a short bibliography referencing the definitive works in the field.

Secured transactions law has been subjected to a close scrutiny over the last two decades. One of the main reasons for this is the importance of availability of credit and the consequent need to reform collateral laws in order to improve access to

finance. The ability to give security effectively influences not only the cost of credit but also, in some cases, whether credit will be available at all. This requires rules that are transparent and readily accessible to non-lawyers as well as rules that recognise the needs of small and medium-sized enterprises. This book critically engages with the challenges posed by inefficient secured credit laws. It offers a comparative analysis of the reasons and the needs for a secured transactions law reform, as well as discussion of the steps taken in many common law, civil law and mixed law jurisdictions. The book, written under the auspices of the Secured Transactions Law Reform Project, informs the debate about reform and advances novel arguments written by world renowned experts that will build

Study the existing literature, and as such will be of interest to academics, legal practitioners and the judiciary involved in secured transactions law around the world. The text considers reform initiatives that have taken place up to the end of April 2016. It has not been possible to incorporate events since then into the discussion.

However, notable developments include the banks decree passed by the Italian Government on 29th June 2016, and the adoption of the Model Law on Secured Transactions by UNCITRAL on 1st July 2016.

The law of secured transactions has seen dramatic changes in the last decade. International organisations, particularly the United Nations Commission on International Trade Law (UNCITRAL), have been working

towards the creation of international legal standards aimed at the modernisation and harmonisation of secured financing laws (eg, the United Nations Convention on the Assignment of Receivables in International Trade, the UNCITRAL Legislative Guide on Secured Transactions and its Intellectual Property Supplement, the UNCITRAL Guide on the Implementation of a Security Rights Registry and the UNCITRAL Model Law on Secured Transactions). The overall theme of this book is international (or cross-border) secured transactions law. It assembles contributions from some of the most authoritative academic voices on secured financing law. This publication will be of interest to those involved in secured transactions around the world, including policy-

This book features the work of international experts on personal property security law. It focuses on the reform of UK company charge law and, in particular, addresses the question as to whether this country should follow the lead of other jurisdictions that have adopted US Article 9 type personal property security schemes.
