The new edition of Exploring Psychology offers outstanding currency on the research, practice, and teaching of psychology. Myers and DeWall inspire students with fascinating findings and applications, effective new study tools and technologies, and a compassionate and compelling storytelling voice. Their presentation is based on the same guiding principles behind the entire family of textbooks that have made David Myers the world's bestselling introductory psychology author: Facilitate learning by teaching critical thinking and helping students at every step. Present psychology as a science, emphasizing the process of inquiry and putting facts in the service of concepts. Make sure students come away with an appreciation of psychology's big ideas, and with a deeper respect for humanity—what drives us, distinguishes us, unifies us. This Exploring Psychology is the first to include Myers' handpicked co-author, Nathan DeWall shares Myers' belief that instilling a sense of curiosity and inquiry about psychological science is an effective way to help students navigate the content, think critically, and prepare for a lifetime of learning and living. The extraordinary, longtime Myers ancillary author team is also here—a group whose teamwork, consistency, and commitment again sets the industry-standard for instructor and student supplements. The high quality that consistently sets Myers' ancillaries apart sees a new incarnation in LaunchPad. This course space organizes all the book's digital resources in an online format that makes it easier for instructors to teach, track, and assess their students

David Myers' bestselling Psychology has reached a wider audience of students and instructors with each new edition. Myers and his team lead the field in being attuned to psychology's research and the needs of the instructors and students in the course today. Ten million student class testers and thousands of adopting instructors can attest to the quality of this project. True to form, this landmark new Tenth Edition is another vigorous, deeply considered revision. DSM 5 Updates Available for Fall 2014 classes, this update version features new content from David Myers in response to the release of the DSM-5. This new content is integrated into the text without changing pagination or the structure of the chapters. A special DSM 5 Supplement by the David Myers is available for Fall 2013 and Spring and Summer 2014 courses. View the Page-Referenced Guide to the DSM-5 updates for Psychology. The new edition of Exploring Psychology in Modules offers outstanding currency on the research, practice, and teaching of psychology. Myers and DeWall inspire students with fascinating findings and applications, effective new study tools and technologies, and a compassionate and compelling storytelling voice. Their presentation is based on the same guiding principles behind the entire family of textbooks that have made David Myers the world's bestselling introductory psychology author: Facilitate learning by teaching critical thinking and helping students at every step. Present psychology as a science, emphasizing the process of inquiry and putting facts in the service of concepts. Make sure students come away with an appreciation of psychology's big ideas, and with a deeper respect for humanity—what drives us, distinguishes us, unifies us. This Exploring Psychology in Modules is the first to include Myers' handpicked co-author, Nathan DeWall shares Myers' belief that instilling a sense of curiosity and inquiry about psychological science is an effective way to help students navigate the content, think critically, and prepare for a lifetime of learning and living. The extraordinary, longtime Myers ancillary author team is also here—a group whose teamwork, consistency, and commitment again sets the industry standard for instructor and student supplements. The high quality that consistently sets Myers' ancillaries apart sees a new incarnation in LaunchPad. This course space organizes all the book's digital resources in an online format that makes it easier for instructors to teach, track, and assess their students. This text offers the content organized in 45, student-friendly modules, assignable in any sequence and brief enough to be read in one sitting. Students digest material better when they process it in smaller chunks—as spaced rather than massed practice—and instructors often appreciate the flexibility of assigning any modules in any order.

This edition has been revised to introduce a more flexible structure for the teaching and studying of social psychology and includes up-to-date, international research in the area.

Why Myers? David Myers has become the world's best-selling introductory psychology author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human impact. Why Modules? This modules-based version of Myers' best-selling, full-length text, Psychology (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose.
