Lectures on the philosophy of world history : introduction, reason in history / Georg Wilhelm Friedrich Hegel ; translated from the German edition of Johannes Hoffmeister by H. B. Nisbet ; with an introduction by Duncan Forbes.

An English translation of Hegel's introduction to his lectures on the philosophy of history, based directly on the standard German edition by Johannes Hoffmeister, first published in 1955. The previous English translation, by J. Sibree, first appeared in 1857 and was based on the defective German edition of Karl Hegel, to which Hoffmeister's edition added a large amount of new material previously unknown to English readers, derived from earlier editors. In the introduction to his lectures, Hegel lays down the principles and aims which underlie his philosophy of history, and provides an outline of the philosophy of history itself. The comprehensive and voluminous survey of world history which followed the introduction in the original lectures is of less interest to students of Hegel's thought than the introduction, and is therefore not included in this volume.

wide criticism both from Western and Eastern scholars.

"An elegant and intelligent translation. The text provides a perfect solution to the problem of how to introduce students to Hegel in a survey course in the history of Western philosophy." -- Graham Parkes, University of Hawaii

One of the great classics of Western thought develops concept that history is not chance but a rational process, operating according to the laws of evolution, and embodying the spirit of freedom.

This is the first complete translation in over 150 years of what many consider to be Hegel's most accessible work. The Lectures on the Philosophy of History are a tour-de-force, an audacious attempt to summarize world history and the purpose behind it. Was Hegel the progenitor of the power-state that unified Germany became? The Lectures, the mature fruit of Hegel's thought, provide many relevant clues. Hegel saw the growth of freedom as the purpose behind history, but he also argued that such freedom could not take root and flourish apart from a state able to impose and enforce the rule of law.
