and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through.

Clear, accessible, and teachable, "Stats: Modeling the World" leads with practical data analysis and graphics to engage students and get them thinking statistically from the start. Through updated, relevant examples and data--and the authors' signature "Think, Show, and Tell" problem-solving method--students learn what we can find in data, why we find it interesting, and how to report it to others. The new Fourth Edition is even more engaging than previous editions, builds on the innovative features that have made the first three editions so popular, and

includes revisions designed to make it even easier for students to put the concepts of statistics together in a coherent whole.

By leading with practical data analysis and graphics, "Stats: Modeling the World" gets students "doing statistics" and "thinking statistically" from the start. Students understand what we find in data, why we find it interesting, and how we report it to others as a sound foundation for the challenges of inference. Instructors praise "Stats Modeling the World" as clear and accessible to students, and students report that
