For four decades, this extraordinary textbook played a pivotal role in the way biochemistry is taught, offering exceptionally clear writing, innovative graphics, coverage of the latest research techniques and advances, and a signature emphasis on physiological and medical relevance. Those defining features are at the heart of this new edition. The ninth edition of Stryer/Berg Biochemistry focuses on the themes of visualization and assessment and is now paired for the first time with SaplingPlus, the most innovative digital solution for biochemistry students. SaplingPlus offers the best combination of media-rich

resources to help students visualize material and develop successful problem-solving skills to master complex concepts in isolation, and draw on that mastery to make connections across concepts. Built-in assessments help students keep on track with reading and become proficient problem solvers with guidance from hints and targeted feedback, ensuring every problem counts as a true learning experience.

Derived from the classic text originated by Lubert Stryer and continued by John Tymoczko and Jeremy Berg, Biochemistry: A Short Course focuses on the major topics taught in a one-semester biochemistry

course. With its brief chapters and relevant examples, this thoroughly updated new edition helps students see the connections between the biochemistry they are studying and their own lives. The focus of the 4th edition has been around: Integrated Text and Media with the NEW SaplingPlus Paired for the first time with SaplingPlus, the most innovative digital solution for biochemistry students. Media-rich resources have been developed to support students' ability to visualize and understand individual and complex biochemistry concepts. Built-in assessments and interactive tools help students keep on track with reading and become proficient problem solvers with the help and guidance of hints and targeted feedback--ensuring every problem counts as a true learning experience. Tools and Resources for Active Learning A number of new features are designed to help instructors create a more active environment in the classroom. Tools and

resources are provided within the text, SaplingPlus and instructor resources. Extensive Problem-Solving Tools A variety of end of chapter problems promote understanding of single concept and multi-concept problems. Built-in assessments help students keep on track with reading and become proficient problem solvers with the help and guidance of hints and targeted feedback--ensuring every problem counts as a true learning experience. Unique case studies and new Think/Pair/Share Problems help provide application and relevance, as well as a vehicle for active learning.

This book presents the biochemistry of mammalian cells, relates events at the cellular level to the subsequent physiological processes in the
