A history of the industrial and construction machines built by the International Harvester Company along with Hough and Dresser.

At a moment of great discovery, one Big Idea can change the world... Black holes have long been a topic of fascination, from pop culture to science fiction. Stephen Hawking's discoveries and research on black holes and cosmology have made him an academic celebrity and perhaps the best-known scientist of our time. His book, A Brief History of Time, was a record-breaking, worldwide bestseller and his Big Ideas have changed the way we view the world and the universe, for ever. Hawking & Black Holes tells the incredible story of Hawking's early life in which he created his own complicated board games, to his being diagnosed with AML, and his subsequent brilliant research into black holes and the cosmos. Hawking's Big Idea is presented in an accessible and engrossing way, providing an explanation of the meaning and importance of his discoveries, and the way his work has changed and influenced our lives today. The Big Idea series is a fascinating look at the greatest advances in our scientific history, and at the men and women who made these fundamental breakthroughs.

More than twenty years have passed since Walter Auffenberg's monumental The Behavioral Ecology of the Komodo Monitor. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

The first study of pragmatics with an introduction organised by key terms, including short biographies of key thinkers, and a list of key works for further reading.

The smell of burnt cake is not a good omen for Annie when she arrives at the Black Cat Cafe. But little does she know that her Aunt Leona's cooking disaster is only the first of many problems she'll be served in a big basket of cracked Easter eggs. Annie quickly learns that being in charge at the Black Cat Caf isn't all chocolate-covered strawberries and carrot cakes. In addition to the variety of tasty pastries she needs to make for Easter, she stumbles on a body and what appears to be a robbery. With money disappearing from bank accounts, snooping seniors appearing out of the blue, and clues turning up in the most unlikely places, Annie's problems sizzle more than Leona's hot cross buns. Determined to help her new friends, Annie and her therapy dog land in the middle of a murder investigation. Clues pile higher than a basket of Easter eggs, all pointing to one of the seniors. Annie searches for something to keep her friend from landing in a jail cell but instead, Annie ends up right in the killer's crosshairs. ***Easter Buried Eggs is volume 10 in the Black Cat Cafe Cozy Mystery Series. Lyndsey's books can be read and enjoyed in any order.

Papers presented at an India-Canada International Conference on Violence Against Women: Women Against Violence.
