The Future of Humanity: Birth of a New Species For almost 4 billion years, species have evolved according to the principles of natural selection. For example, proto-giraffes who had longer necks than their contemporaries could reach higher branches and access more food. Therefore, they had a better chance of survival and passing on their genes.

What Is The Future Of Humanity? | Issue 119 | Philosophy Now

The book offers an engaging and empirically-grounded synoptic view of humanity's past, present, and future, and of the risks threatening to cause that future to be far worse than it could be. Do not be intimidated by the fact that the book is 480 pages long. The main text is only about 250 pages, and the rest is notes, references, and appendices.
