This book gives all teachers in grades 5-12 practical strategies for building the unique literacy skills that students need for success in their respective subject areas. Drawing from interviews with leading educators and professionals in science, mathematics, history, the arts, and other disciplines, the authors explain what disciplinary literacy is and discuss ways to teach close reading of complex texts, discipline-specific argumentation skills, academic vocabulary, the use of multimodal tools and graphic organizers, and more. User-friendly features include classroom materials, lesson plans, practice activities, and recommended online teaching videos. Purchasers get access to a Web page where they can download and print the book's 20 reproducible forms in a convenient 8 1/2" x 11" size.

Knowledge of word meanings is critical to success in reading. A reader cannot fully understand a text in which the meaning to a significant number of words is unknown. Vocabulary knowledge has long been correlated with proficiency in reading. Yet, national surveys of student vocabulary knowledge have demonstrated that student growth in vocabulary has been stagnant at best. This volume offers new insights into vocabulary knowledge and vocabulary teaching. Articles range from a presentation of theories of vocabulary that guide instruction to innovative methods and approaches for teaching vocabulary. Special emphasis is placed on teaching academic and disciplinary vocabulary that is critical to success in content area learning. Our hope for this volume is that it may spark a renewed interest in research into vocabulary and vocabulary instruction and move toward making vocabulary instruction an even more integral part of all literacy and disciplinary instruction.

Carefully explains and illustrates ten key reading skills that are widely recognized to be essential for literal and critical comprehension. Provides activities and reading selections to help you practice and master those skills.

Too often, students who fail a grade or a course receive remediation that ends up widening rather than closing achievement gaps. According to veteran classroom teacher and educational consultant Suzy Pepper Rollins, the true answer to supporting struggling students lies in acceleration. In *Learning in the Fast Lane*, she lays out a plan of action that teachers can use to immediately move underperforming students in the right direction and differentiate instruction for all learners—even those who excel academically. This essential guide identifies eight high-impact, research-based instructional approaches that will help you

- * Make standards and learning goals explicit to students.
- * Increase students' vocabulary—a key to their academic success.
- * Build students' motivation and self-efficacy so that they become active, optimistic participants in class.
- * Provide rich, timely feedback that enables students to improve when it counts.
- * Address skill and knowledge gaps within the context of new learning.

Students deserve no less than the most effective strategies available. These hands-on, ready-to-implement practices will enable you to provide all students with compelling, rigorous, and engaging learning experiences.
