This is the most common translation problem faced by clients who need Translation Services: The biggest challenge for the client when facing a translation is to strike a balance between cost and quality. It is especially important in the case of translations of technical or medical manuals, or legal documents. You can barely afford to have any mistakes or near mistakes in such documents, as it could lead to misinterpretation by the readers and wrong usage - and that could result in damage ...

Problem-Solving Strategies for Common Translation Problems. As every translator knows, there is much more to translation than simply possessing a native or native-level fluency in two or more languages. Translators face many different problems, from differences in style to untranslatable expressions. We've listed a few common problems for translators, along with strategies to deal with them:

What are the Problems of Translation and its Solution. By medtrans September 6, 2018 General. Translation isn't a natural process, so any languages that need to be translated should be undertaken by experienced translators who know both the source and targeted languages well. One of the common challenges in translation is having a deep understanding of not just the language but also the culture of the two languages that need to be translated.

TRANSLATING A NOVEL: PROBLEMS AND SOLUTIONS (A HOLISTICALLY CRITIQUE ON NOVEL TRANSLATION) Translating a novel is more difficult than translating academic texts. Novel translators (Genetic factor) usually have problems in translating figurative languages (metaphors, similes, personifications, etc.) and idiomatic expressions because they should reproduce in the target language (TL) the closest natural equivalence of the source language (ST) message, firstly in terms of meaning and secondly in ...

~~Teaching Translation Techniques in a University Setting ...~~

A translation problem is any difficulties we come across at translating that invites us to stop translating in order to check, recheck, reconsider, rethink or rewrite it or use a dictionary, or a reference of some kind to help us overcome it and make sense of it.

"This text is an essential coursebook for all Arab learners studying translation. Featuring a bottom-up approach to translation issues, it is informative, interesting and self-explanatory. The examples used in the book cover a wide range of topics, and are tuned to suit the level of beginner translation students. The unique combination of discussion and practical exercises following each topic makes this book ideal for Arab undergraduate students."

This book deals with the problems in translating literary prose and reveals some pertinent solutions and also concentrates on the need to expand the perimeters of Translation Studies. The translation courses offered at many universities in Bangladesh and overseas treat the subject mostly as an outcome of Applied Linguistics. Presently, the teachers and students of translation are confused at the mounting impenetrability of the books and articles that flood the market. Unfortunately, the translators lay more emphasis on the translation of poetry; there should be more research regarding the particular problems of translating literary prose. One explanation of this could be the fact that the status of poetry is considered higher, but it is more possibly due to the notable flawed notion that the novels, essays, fiction etc. possess simple structures compared to that of a poem and is thus easier to translate. However, many debates have been organised over when to translate, when to apply the close local equivalent, when to invent a new word by translating clearly, and when to copy. Simultaneously, the "untranslatable" cultural-bound words and phrases have been continuously fascinating the prose-translators and translation theorists. The plea made in this book is to admit the fact that there is a lot to be learnt from shaping the criteria for undertaking a prose-translation and we should appreciate the hard work, difficulties, or frustration of the 'translators' (go-betweens) in the creation of good sense of the texts.

This title features Greek text and English translation, plus fragments, of New Testament problems and solutions.

Children's literature delights in made-up words, nonsensical terms, and creative nicknames, but how do you translate these expressions into another language?
 This book provides a new approach to translation studies to address the challenges of translating children's literature. It focuses on expressive language (nonsense, names, idioms, allusions, puns, and dialects) and provides guidance for translators about how to translate such linguistic features without making assumptions about the reader's capabilities and without drastically changing the work. The text features effective strategies for both experienced translators and those who are new to the field, including exercises and discussion questions that are particularly beneficial for students training to be translators. This learner-friendly book also offers original contributions to translation theory in light of the translation issues particular to children's literature.

Many “translation solutions” (often called “procedures,” “techniques,” or “strategies”) have been proposed over the past 50 years or so in French, Chinese, Russian, Ukrainian, English, Spanish, German, Japanese, Italian, Czech, and Slovak. This book analyzes, criticizes and compares them, proposing a new list of solutions that can be used in training translators to work between many languages. The book also traces out an entirely new history of contemporary translation studies, showing for example how the Russian tradition was adapted in China, how the impact of transformational linguistics was resisted, and how scholarship has developed an intercultural metalanguage over and above the concerns of specific national languages. The book reveals the intensely political nature of translation theory, even in its most apparently technical aspects. The lists were used to advance the agendas of not just linguistic nationalisms but also state regimes – this is a history in which Hitler, Stalin, and Mao all played roles, Communist propaganda and imperialist evangelism were both legitimized, Ukrainian advances in translation theory were forcefully silenced in the 1930s, the Cold War both stimulated the application of transformational grammar and blocked news of Russian translation theory, French translation theory was conscripted into the agenda of Japanese exceptionalism, and much else.

The problems involved in translating existing questionnaires and other paper and pencil instruments from one language to another are discussed here. This text shows how to identify the problems with an existing instrument, how to solve each of these problems with step-by-step guidelines.
