Shattering the Illusion is the first book to gather and comparatively analyze policies addressing child sexual abuse complaints in a selection of religious institutions in Canada. Although there is a substantial body of literature regarding Christianity and sexual abuse, very little of it focuses on religious institutions in Canada and their respective policies. In the foreword, Tracey J. Trothen summarizes the Cornwall Inquiry, out of which this book arose. She then examines the Roman Catholic Church, The United Church of Canada, the Anglican Church, the Mennonite Church, Islam, and the Canadian Unitarian Council/Unitarian Universalist Association, describing in detail the evolution and particular content of policies and procedures that address child sexual abuse complaints directed at paid and volunteer faith community representatives and/ or leaders. She identifies differences and common themes among the approaches taken by the institutions and provides a summary table for an accessible comparative overview. Child sexual abuse is not new, but the emergence of policies to address abuse complaints within religious institutions is. This book identifies significant and shared causal factors behind the emergence of policy and reviews their content carefully. This review will serve as a significant tool for furthering the development of such policies.

Taking on a still-controversial topic, a diverse group of experts, including victims and clergy, offers reflections on the sexual abuse crisis in the Catholic Church, examining what the church has done—and what it still needs to do—to protect children.

This four-volume set provides a history of veteran's healthcare that examines programs of care and veterans' special needs, and offers insight into future directions for veteran's healthcare in the 21st century.

This book blends resilience theory and the lessons learnt from intervention programs to promote youth well-being. By adopting a systems approach the author identifies her method of treating troubled and at risk youth. Practitioners who work with marginalised youth will benefit from this text.

The statistics are pretty grim - young people face an ever increasing tide of poverty, alcohol and drug abuse, violence, suicide, and family dysfunction. Society's response has been slow. Too many young people do not receive consistent, positive, and realistic validation of themselves from those adults on whom they depend. Nurturing Future Generations goes beyond the stilted rhetoric on the problems of youth and the dilemma for society by outlining specific treatment intervention and prevention strategies that address the full spectrum of dysfunctional behavior. It introduces structured intervention strategies for school and community collaboration, with an emphasis on remediation and treatment. Educators and helping professionals will find counseling strategies and psychoeducational techniques that focus

on primary prevention. These primary prevention strategies are supported by an understanding of critical social, emotional, and cognitive skills. The new edition provides an increased focus on the positive aspects of youth development, with less emphasis placed on the dysfunctional side of youth behavior. The book addresses emerging research on resiliency and includes increased coverage of best practices for use with troubled youth. A new chapter on LGBT youth issues has been added, and the existing chapters have been substantially revised and updated. The author has reorganized sections within each chapter, adding to the readability and flow of the book, making it more useful as both a professional reference and supplemental text.
