"Rendering" is the reproduction or representation of an architect's design in the form of a drawing of the building as it will appear, complete with accessory details such as trees, traffic and people. It is also much used in preparing drawings for engineers, designers and manufacturers, and in advertising and industry generally. Mr. Gill has produced a concise, thorough and copiously illustrated guide to techniques and methods, including sections on perspective, projection, shadow, reflections, and on how to draw cars, ships, aircraft, trees, human figures and so on. He also describes the very wide range of instruments and equipment that is available from different countries. -- From publisher's description.

Presents history and techniques of the following textile printing processes: block, copper-plate, engraved roller, lithographic, screen, and transfer. Also discusses polychromatic dyeing, new dyes and the history
