### Wayfinding Architecture

Wayfinding is an important aspect of design within different scales. It is defined by the use of spatial and environmental cues to move from one place to another. Noticeably, these urban and architectural elements go beyond simply signage.

### Wayfinding Architecture

#### Environmental Design Vol 4

Whilst wayfinding applies to cross disciplinary practices including architecture, art and design, signage design, psychology, environmental studies, one of the most recent definitions by Paul Symonds et al. defines wayfinding as "The cognitive, social and corporeal process and experience of locating, following or discovering a route through and to a given space". Wayfinding is an embodied and sociocultural activity in addition to being a cognitive process in that wayfinding takes place ...

#### Wayfinding—Wikipedia

Human wayfinding in the natural environment has been practised for thousands of years. In the urban or built environment, few natural cues are available and other aids to

wayfinding are needed. This paper considers the problems of wayfinding in airport terminals, what cues are available and how passengers use them to reach their destinations.

### ~~Wayfinding and Airport Terminal Design | The Journal of ...~~

The wayfinding design approach is a discipline aimed at implementing integrated guidance systems within the environment in a universal, sustainable and intelligent way. The purpose of wayfinding is to improve the legibility of an area and to facilitate people ' s orientation, in order to obtain social and economic benefits.
